
Light Specification

Clear Marlon CS can achieve almost 90% light transmission making it an ideal material for applications requiring maximum light transmission. A range of tints are also available for varying degrees of light diffusion and solar control.

Light Transmission Table

	Colour	Marlon CS
Maximum Light	Clear	88%
	Glass Clear (g)	-
Diffused Light	Diffuser	73%
	Pearlescent (g)	-
Controlled Light	Opal	46%
	Bronze	32%
	Solar Grey	29%
Solar Control	Heatguard	7%
